# Introduction to AI

*An introduction to AI for teachers who are  
curious but unsure where to begin.  
No prior experience needed!*

AI is rapidly becoming part of everyday teaching and learning, but not everyone is comfortable using it. This session helps you build confidence, understand the basics, and use AI in ways that support rather than replace your professional expertise. In this two-hour learning session, you will be provided with an overview of:

- What generative AI is (in plain language)
- How tools like chatbots actually work
- Everyday classroom uses that save time
- Tips for writing effective prompts
- How to use AI responsibly and ethically with students
- Quick wins you can try the very next day

***This learning session is being offered both in-person  
and via Zoom. Please only sign up for one or the  
other. The same content will be presented at both.***
