Aligns with the Ohio Department of
Education & Workforce's 4 Priorities

- Literacy
- Learning Acceleration
- Student Wellness
- Workforce Readiness

AI can be a powerful partner when used thoughtfully and with an eye towards its potential problems. However, it can be all-too-easy for users to forget that everything it produces needs to be analyzed with a critical eye. Protecting student privacy and respecting intellectual property rights also needs to be considered. During this learning session, we will help educators model integrity, protect students, and build a culture of responsible use. Specifically, we will cover:

- What ethical AI use means in a school setting
- How to use AI responsibly when creating your own materials
- How to guide students in using AI safely and appropriately
- Strategies for transparency, attribution, and academic honesty
- How to spot and avoid bias, inaccuracies, and over-reliance
- Classroom scenarios that show ethical vs. unethical use

***This learning session
is being offered both
in-person and via
Zoom. Please only
sign up for one or the
other. The same
content will be
presented at both.***
