Use Your Data as a Flashlight, Not a Hammer

Using TIDE's Benchmark & Checkpoint Tests

*Pretest your students using these free tests,
then use AI to guide your analysis*

You have your students' OST scores from last spring, but that's looking backwards rather than ahead. Using Ohio's Benchmark and checkpoints tests, you can assess your students strength and weaknesses on this year's content. Additionally, these tests allow you to:

- See all test questions.
- See all student answers.
- Examine rubrics.
- Observe how the system's AI scores written answers.
- Know where to focus your limited time and energy.
- Catch problems with the system before actual testing.

After you've collected your data, you have the option of coming back for a second workshop during which we will work together to examine the results using a combination of AI, Performance Level Descriptors, and the standards themselves.
