ESCLEW SPOTLIGHT PRESENTER SERIES:

Engaging Your Math Student with Digital Tools

With the right tools you can transform passive math learning into active discovery. In this session, we will explore how to use purposeful technology integration to effectively bridge the gap between abstract concepts and concrete understanding. Specifically, we will:

- Explore different online platforms like Classkick and Pear Learning.
- Discover how using these platforms dismantles barriers and foster deep mathematical thinking.
- Learn how to provide real-time feedback.
- Analyze how to catch misconceptions before they take root.
- Foster student engagement.

Make math more visible, interactive, and inclusive for every learner in your classroom.

ESCLEW welcomes guest presenter Sarah Ahmad from the North Dayton School of Discovery for this Zoom presentation aligned with the National Council of Teacher of Mathematics (NCTM) standards.
