BOOK STUDY

5 Practices for Orchestrating Productive Mathematics Discussions

Are you ready to spark meaningful math conversations driven by student reasoning and thinking? Join this book study to learn how to structure productive math talks within your classrooms!

The five manageable practices outlined in this book are aimed to drive student conversation in the math classroom. They have the power to put teachers in control of productive classroom discussions.

- Anticipating
- Monitoring
- Selecting
- Sequencing
- Connecting

Throughout this book study participants will read the book, engage with the material through processing activities, and share ideas with other participants through Google Classroom assignments and one virtual meeting.

Participants are responsible for
purchasing a copy of the book.
