Aligns with the Ohio Department of
Education & Workforce's 4 Priorities

Literacy

Learning Acceleration

Student Wellness

Workforce Readiness

The ESC of Lake Erie West is hosting a professional learning series designed to empower all educators with a deep understanding of the foundations of early numeracy, fostering mathematical success for every student. The emphasis will be on essential skills such as counting, place value, addition, subtraction, as well as mathematical fluency. Explore resources for instruction, intervention, and assessment.

Workshop Objectives

- ✿ Learn the foundations and principles of developing mastery with counting.
- ✿ Explore the multiple aspects of place value that lead to long-lasting success.
- ✿ Develop a deeper knowledge of the beginning stages of addition and subtraction.
- ✿ Discuss mathematical fluency and best practices for supporting growth to fluency.

"The presenters are dynamic and captivating. They are experts in their field, yet relatable and approachable. It is refreshing to see early numeracy as a focus in education. Districts could see true changes in their math instruction by getting as many primary teachers to this series as they can!"
